Gurugram, India

PROFILE SUMMARY

Frontend Developer with hands-on experience in building responsive and interactive web applications using HTML, CSS, JavaScript, and React. Currently pursuing an MCA after completing a BCA in AI/ML. Strong understanding of frontend fundamentals, DOM manipulation, and UI development. Actively seeking an entry-level Frontend Developer role to contribute to real-world products while growing as a software engineer.

TECHNICAL SKILLS

Frontend Development

- HTML5, CSS3, JavaScript (ES6+)
- React.js
- Responsive Web Design
- DOM Manipulation

Tools & Platforms

- Git, GitHub
- Figma (UI reference & prototyping)
- VS Code

Backend (Basic)

- Node.js
- REST APIs

PROJECTS

Sorting Algorithm Visualizer

HTML, CSS, JavaScript

- Developed an interactive web application to visualize sorting algorithms such as Bubble Sort, Selection Sort, and Insertion Sort.
- Implemented real-time animations to demonstrate algorithm flow and time complexity.
- Strengthened JavaScript fundamentals, DOM manipulation, and problem-solving skills.
